

Wildlife Watcher User Guide

From wildlife.ai

For [Wildlife Watcher](#) project

Setup external tools

Download [PDF](#)

1. Data Science tools

Wildlife insight

Wildlife Insights is recommended for image processing and machine learning models management.

AddaxAI account

AddaxAI is optimizing the usage of CampTrap formatted datasets while doing image processing. You can get annotations and reports done automatically.

Edge Impulse

- View available models
- Add model to project
- Train model
- Download model

2. Communication tools

Trap NZ account

- Trap NZ comms tool is recommended for real time notifications from machine learning models and LoRaWAN comms
 - Create an account
 - Create project
 - Connect to a device
