Wildlife Watcher User Guide

From wildlife.ai
For Wildlife Watcher project

Image processing

1. **Image processing**
 - Wildlife Insights image processing tool is recommended for image processing
 - Users can access all required templates and documentation via the SD card, once deployment is ended
 - User is required to:
 - Create an account with Wildlife Insights
 - Transfer the SD card from the camera to their laptop/computer
 - Upload the data template into Wildlife insights
 - Transfer/upload pictures into Wildlife Insights
 - Dev's guide to be used here
