

Wildlife Watcher User Guide

From wildlife.ai

For [Wildlife Watcher](#) project

Image processing

Regarding image processing, we suggest two tools: Wildlife Insights and AddaxAI regarding you usage.

Wildlife Insights

Wildlife Insights image processing tool is recommended for simple image processing.

- Users can access all required templates and documentation via the SD card, once deployment is ended
- User is required to:
 - Create an account with Wildlife Insights
 - Transfer the SD card from the camera to their laptop/computer
 - Upload the data template into Wildlife insights
 - Transfer/upload pictures into Wildlife Insights
 - Dev's guide to be used here

Wildlife Insights user guide.

AddaxAI
